

Our Secret LipoSuction Comparison Chart

The Most Popular Lipo
Procedures Compared
Side-by-Side.

See Which One Is The Best For You.

ZELKO
AESTHETICS

ZBody Sculpt

Hi, I'm Dr. Timothy Zelko, a **Nationally Recognized Body Contouring Provider**. In the last 11 years of my career I have performed thousands of body contouring procedures and have helped women achieve the body they desire without significant invasive surgeries, pain or excessive downtime.

I do this with the **Tickle Lipo procedure** that provides a gentle approach to liposuction and in my opinion, is the best liposuction procedure available. Tickle Lipo benefits include: No general anesthesia, little discomfort, permanent removal of fat cells, quick recovery period, superior body sculpting, and convenience. It can be performed on Love Handles, Upper and Lower Abdomen, Inner Thighs and Outer Thighs, Hips, Buttocks, Chin, Chest, Upper Arms, Back Rolls, Legs and Ankles.

In the following pages you'll find **Our Secret Liposuction Comparison Chart**. What makes the chart unique is that I've used every technology listed. It is unlikely that there is another doctor in the US that has this experience with all the various technologies.

I have rigorously searched for THE BEST procedure for you. This chart will give you a thorough understanding of your options. With this information, you are now able to make an informed decision on which procedure is right for you.

TICKLE LIPO

LipoSuction Comparison Chart

This chart is unique. You will not find this type of accurate information anywhere else online. Dr. Zelko is the author of this table and it is his experience using every technology listed that populates this chart. It is unlikely that there is another doctor in the US that has this type of experience with all the various technologies.

NAMES		Smart Lipo	ProLipo	CoolLipo	Lipotherm	SlimLipo
Mechanism of Action	Infrasonic Energy	Laser	Laser	Laser	Laser	Laser
Excessive Heat Exposure	No	Yes	Yes	Yes	Yes	Yes
Use of Sharp or Cutting Instrumentation	No	Yes	Yes	Yes	Yes	Yes
Numbing Process*	Comfortable	Uncomfortable	Uncomfortable	Uncomfortable	Uncomfortable	Uncomfortable
Use of Tumescant (Local) Anesthesia	Yes	Yes	Yes	Yes	Yes	Yes
Length of Procedure	3 hours	3-5 hours	3-5 hours	3-5 hours	3-5 hours	3-5 hours
Recovery Process/Time to End Result	Shortened at 3-4 wks	Prolonged/ 3-6 months	Prolonged/ 3-6 months	Prolonged/ 3-6 months	Prolonged/ 3-6 months	Prolonged/ 3-6 months
Drainage Amount**/Days	Minimal/1-2	Moderate/3-5	Moderate/3-5	Moderate/3-5	Moderate/3-5	Moderate/3-5
Time to Resume Normal Activity	1-3 wks	2-4 wks	2-4 wks	2-4 wks	2-4 wks	2-4 wks
Compression Garment Length of Wear***	1-2 wks	4-6 wks	4-6 wks	4-6 wks	4-6 wks	4-6 wks
Fat Removal Effectiveness	Good	Good	Good	Good	Good	Good
Amount of Pain Post-Procedure	Minimal	Minimal - Moderate	Minimal - Moderate	Minimal - Moderate	Minimal - Moderate	Minimal - Moderate
VERY IMPORTANT Supranatant/Infranatant Ratio (average)****	80%	65%	65%	65%	65%	65%

This ratio is the amount of fat removed (supranatant) to the amount of anesthetic fluid (infranatant) that comes out during the procedure.

* Numbing Process refers to the amount of discomfort that you experience during the anesthetic portion of the procedure.

** Drainage Amount refers to the amount of fluid that will drain from the incision sites post-procedure.

*** Compression Garment is the tight fitting garment that is worn post-procedure to minimize post-operative swelling. The degree of swelling is related to the amount of tissue damage; the more tissue damage the longer a garment needs to be worn.

**** This is an extremely important measurement of effective and comfortable fat removal, unfortunately it is never talked about. This ratio is the amount of fat removed (supranatant) to the amount of anesthetic fluid (infranatant) that comes out during the procedure. You want as much fat as possible to come out and you want as much anesthetic fluid to remain in the body during the procedure, to keep you comfortable. Therefore the higher this percentage the more thorough and comfortable is the fat removal process.

TICKLE LIPO

LipoSuction Comparison Chart

This chart is unique. You will not find this type of accurate information anywhere else online. Dr. Zelko is the author of this table and it is his experience using every technology listed that populates this chart. It is unlikely that there is another doctor in the US that has this type of experience with all the various technologies.

NAMES		VASER	Bodyjet	Traditional Lipo	Power Assisted Lipo
Mechanism of Action	Infrasonic Energy	Ultrasonic Energy	High Pressure Water Spray	Mechanical Cutting	Mechanical Cutting
Excessive Heat Exposure	No	Yes	No	No	No
